

CYBERSECURITY IS RISK MANAGEMENTSM

NOW WHAT? Government regulatory agencies are indicating they won't pull any punches with companies who fail to protect their systems, information and infrastructure—because Cybersecurity is Risk ManagementSM. For more than 35 years, CCA has worked with organizations to identify and analyze operational, process, and compliance risks. We prioritize high impact/high likelihood risks and assist in developing internal processes to mitigate them.

STRATEGICALLY PARTNERED WITH CyFIR, LLC cyfir.com

Our unique strategic partnership with CyFIR LLC give our clients access to cybersecurity monitoring tools provided by some of the world's top technical experts who have worked in government, military, and the private sector. CyFIR Enterprise provides continuous monitoring of endpoints, and greatly reduces the response time in the event of intrusion.

Complete coverage through real-world advice and state of the art monitoring & response

Responsibility for cyber risk management runs throughout the organization; proper procedures, supported by training and awareness are essential to mitigate the risk. We provide a complete, integrated solution custom tailored to any size organization.

WHAT ARE YOUR GREATEST CYBER RISKS?

- Potential cost of a data breach and release
- Theft of intellectual property
- Damage to brand reputation
- Cost of clean-up and restoration
- Regulatory penalties or interventions
- Data held hostage by ransom-ware

HOW CCA ATTACKS BACK

- **One-Source Cyber Services:** Comprehensive risk capabilities paired with worldwide resources
- **System Profile:** Identification of exposure points, vulnerabilities and risks
- **Quantitative Cost Analysis:** Our accurate cost analysis of a potential disruptive cyber event provides dollar figures you can weigh against your cybersecurity investment
- **Scalable Services:** Plans scaled to the size of your organization
- **Monitoring:** Risk vulnerability and occurrence are tracked 24/7/365
- **Powerful Plan:** A step-by-step action process to identify and address risk and mitigate damage
